PRO Linx® BUILDING WRAP *Drain*

Providing a drainage path to protect against water intrusion

ProLinx® Drain Wrap is a non-perforated, non-woven, polyolefin membrane that is installed beneath exterior siding to reduce air infiltration and act as a weather-resistive barrier. ProLinx® Drain Wrap is designed to provide a secondary line of defense against bulk water penetration and provide an air barrier.

BLUELINX
DELIVERING WHAT MATTERS™

Benefits:

- **Surfactant resistant** ProLinx® Drain Wrap is not affected by pressure washing, job-site chemicals, or sugars from tree sap and wood sidings.
- **ProLinx Drain Wrap Minimizes Solar Vapor Drive** The vented air space created by its unique surface provides a stop gap that blocks the transport of vapor by equalizing air pressure across the entire space. This relieves the pressure exerted on the drainage plane (sheathing and building wrap).
- **Perfectly Designed For Stucco and EIFS** Conventional building wrap's smooth surface can cause stucco to bond tightly to the building wrap when used by itself. This tight contact, called the "tenting effect" can destroy the water repellency of building wrap due to the pressure exerted when stucco is directly applied. The applied stucco creates a "capillary continuity" that doesn't allow the building wrap to properly defend against water intrusion when used a single layer. When ProLinx Drain Wrap is installed beneath a primary layer of building wrap, felt paper or paper-backed wire lath, a "bond break" is created which improves and enhances the drainage properties of the stucco system.
- **UV Resistance** Special ultraviolet stabilizers protect it from the sun's harsh rays. In fact, ProLinx Drain wrap is protected against UV rays for up to 4 months.
- **Recognized as an air barrier** Compliant with IRC and IBC as an air barrier.

Warranty Information

A ten (10) year limited warranty applies to PROLinx® Drain Wrap. To obtain a copy of this warranty, please visit bluelinxco.com. No other warranty, express or implied, is given, including any implied warranty of merchantability or of fitness for a particular purpose.

Standard Roll Sizes*

10' x 100' 10' x 150' 10' x 195'

**Custom sizes available upon request. Not all rolls available for digital printing*

World-class building wrap. Localized service.

With a broad geographic footprint servicing 50 states, BlueLinx has branches ready to fulfill your order. Our expert representatives know the geography of the markets you're working in, and product delivery is never far away. PROLinx® can be delivered with other BlueLinx products for your convenience.

Specifications

Property	Standard
CSI ID Code	Air Barriers 07270
Composition	Non-Perforated, High Quality, Non-Woven Polyolefin
Thickness	TAPPI T-411 0.009"
Perm Rating	ASTM E-96A - 12 US Perms
Tensile Strength	ASTM D-882 24 lbs/in. MD 28 lbs/in. CD
Flame Spread	ASTM E-84 Class A
UV Exposure Rating	4 months
Drainage Efficiency	ASTM E2273 Pass > 95%
Water Resistance	AATCC 127
Air Permeance	ASTM E2178 < 0.01 L/s/m ²
Air Porosity	TAPPO T-460 > 1000 sec

10-Year Limited Warranty

Precautions | **Warning:** Protect from high heat or other ignition sources during shipment, storage, and application.

Storage | Take care to protect PROLinx® Building Wrap from exposure to direct sunlight during storage. It is recommended that building wrap to be stored inside or under cover.
